Summary

Recent college graduate with experience designing, developing, and maintaining websites and web applications. Passionate about both web development and web design and actively learning new skills and improving current skill set.

Skills and Abilities

- Proficient with JavaScript, HTML, CSS, Bootstrap, Angular
- Experience with WordPress, Photoshop, InDesign, Illustrator, Premiere Pro
- Bilingual: English and Spanish
- Written and verbal communication skills
- Ability to work independently or as part of a team

Experience

Front-End Web Developer Intern, Jarvis Arms, Rexburg, ID   Jan 2019 to Apr 2019

- Worked independently to develop, design, and maintain website using WordPress. Made edits to CSS, JavaScript, and/or PHP code as needed.
- Communicated directly with owner of Jarvis Arms as website was being developed.

Alarm Operator, AvantGuard Monitoring Centers, Rexburg, ID Apr 2018 to Nov 2018

- Learned and used proprietary software on a daily basis to document what actions were taken with caller. Also provided a method of accountability.
- Answered incoming calls from subscribers regarding their fire, burglar, and/or medical alarm device(s). Helped and answered any inquiries they had regarding their device(s).

Web Developer, Senior Project, Rexburg, ID   Apr 2018 to Jul 2018

- Worked in Agile setting on development of coupon automation system for school's Auxiliary Services in C# with .NET Framework, Material Design, and Angular.
- Designed and developed front-end using Angular with Material Design and JavaScript.
- Worked on a 3-person team using Visual Studio Team Services (now Azure DevOps Services) to plan, organize, and push code to Git repository.

Education

Bachelor of Science in Web Design and Development   Jan 2013 to Apr 2019

Brigham Young University-Idaho
